

AMENDMENTS TO THE CLAIMS

The listing of the claims will replace the previous version, and the listing of the claims:

LISTING OF THE CLAIMS

1-4. (cancelled)

5. (new) A packaging body for heat processing a material retained therein, comprising:

a plastic base material having side joining sections, and end sides, said side joining sections and end sides being superposed and connected together to form a bag for filling the material therein, and

a sealant layer interposed between the end sides to connect the end sides together therethrough to thereby form a vapor communication joining section at the end sides, said sealant layer providing a peeling off property from 0 to 1,200 gf/15 mm at 90°C and a peeling off property of equal to or more than 3 kgf/15 mm at a room temperature so that only when the packaging body is heated more than 90°C, the vapor communication joining section is only opened to release pressure inside the packaging body.

6. (new) A packaging body according to claim 5, wherein said side joining sections are firmly connected together when the packaging body is heated more than 90°C.

7. (new) A packaging body according to claim 6, wherein said sealant layer is formed of a non-stretching polypropylene film.

8. (new) A packaging body according to claim 7, wherein said bag has an elongated rectangular shape, said vapor communication

joining section being formed parallel to a longitudinal direction of the bag.

9. (new) A packaging body according to claim 8, wherein said sealant layer is deposited integrally on an entire surface of the plastic base material.

10. (new) A packaging body according to claim 9, wherein said room temperature is 23°C.

11. (new) A packaging body according to claim 7, wherein said sealant layer is a tape interposed between the side joining sections of the plastic base material to join the side joining sections.
